

CONNECTRAC FLEX[®] RACEWAY SYSTEM

Easily optimize your space with
adaptable power and data.

#LegrandImprovingLives

ANY SPACE. ANY BUILDING. ANY TIME.

The Connectrac® Flex Raceway System is a floor-based power and data distribution system that allows users to quickly add connectivity or change power locations in a snap.

Available with two installation options – under carpet tile and on-top of any flooring surface.

EASILY DESIGN YOUR SPACE

● = Receptacle Devices, ○ = Hubcaps

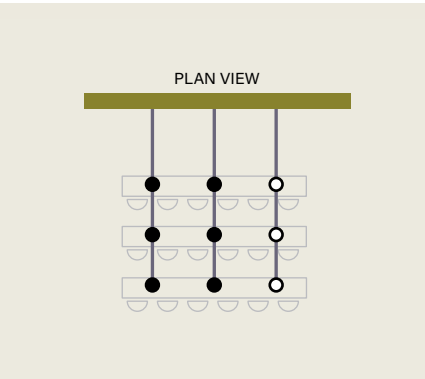

WORK

Equip your Flex Raceway with interchangeable power devices, such as receptacle devices for sit/stand desks or hardwire devices for systems furniture.

EDUCATE

Move power devices wherever they are needed to quickly reconfigure your space into a training or learning environment.

COLLABORATE

Turn collaborative areas into active, agile spaces by changing power device locations in a snap. Tamper-resistant receptacle accessory is available for enhanced safety.

CELEBRATE

Transform your space for events by replacing all power devices with Hubcaps to create a flat, open area free from obstacles.

Entrance Fitting*
Quick connector powers entire
raceway and allows data to enter

Powertrac
Prewired raceway segment

Power Hub
Connects Powertracs
and provides access for
power devices

Interchangeable Power Devices
Quickly snap into any Power Hub
location, including a tamper-
resistant receptacle option

**Transition Ramps
and Top Cover**
Meet ADA compliance

Data Device
Snaps into the raceway to
provide data connectivity

Receptacle Device
Quad device available
in various 4-circuit
options, including
a tamper-resistant
receptacle option

HOW IT WORKS

Explore the features of the
Flex Raceway System

The ideal solution for large, open commercial interior spaces.

*Entrance fitting options include In-Wall (pictured above), Poke-Thru Entrance and Surface-Mounted.
Alternatively, transition from 2400® and 4000® Series Raceways to Flex with our raceway transitions.

(Installation under carpet tile shown)

Surface-Mounted Entrance with Flex installation under carpet tile

VERSATILE ENTRANCE OPTIONS

On-Wall Transition with Flex installation on-top of flooring surface

WALL-BASED ENTRANCES

1) In-Wall

Seamless connection from the base of a wall to the raceway system.

2) Surface-Mounted

For when power and data are supplied outside the wall.

3) On-Wall Transition

Allows power and data to be supplied from nearby 2400D® Series or 4000® Series perimeter raceway systems.

Poke-Thru Entrance with Flex installation under carpet tile

OPEN SPACE ENTRANCE

4) Poke-Thru

Enables system to be started at nearly any point along a concrete floor, eliminating the need to feed power and data from a nearby wall.
